

# Contichrom<sup>®</sup> CUBE FPLC Systems

**Twin-Column  
Protein Purification  
Systems for Batch  
and Continuous  
Processing**

- **Advanced FPLC**  
mAbs & Recombinant Proteins
- **Continuous HPLC**  
Synthetic Peptides & Natural Products
- **Automated & Continuous Purification of Proteins**  
mAbs & Tagged Proteins for Discovery
- **GMP scale-up**  
GMP Production Systems

For further  
information or to  
trial the equipment,  
please contact us:

Uvison Technologies Demo Lab  
6 Nepicar Park, London Road, Sevenoaks, Kent TN15 7AF

# The new 7040 Nitrogen Gas Generator Family

The  
INNOVATIVE  
SOLUTION  
for all LC-MS  
applications

- Integrated scroll compressor with Inverter Control Technology
- WiFi interface for fast service support
- Ultra silent technology: 58 dB(A)
- Dual Nitrogen and Air generator
- Generates nitrogen on demand
- Reliable, runs 24 hours a day
- Compatible with all LCMS
- Low maintenance
- No vibration

# Automated Sample Preparation of solids for HPLC / UHPLC

**accroma**  
accuracy is key

Fully integrated  
with leading brands  
of chromatography  
and informatics

- be more productive
- reduce errors
- get better results

# DS 8000 (Basic) SMART

**LABINDIA**  
ANALYTICAL  
WHERE COMMITMENT IS CULTURE

Precision  
engineered  
for USP<711>  
dissolution for  
ease of use

- 21 CFR Part 11 Compliant, full audit trail, via touch screen
- Mono-shaft design allows quick changeover between apparatus 1 & 2
- Laser etched serial numbers, vessels, paddles, baskets
- Customisable PDF report, USB printing
- Automated tablet dropper
